Consulted with Abebe (class 704).	4/11/2006	M.Z.
Search has been updated using databases provided in the EAST search engine.	4/13/2006	M.Z.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem. 2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the project. 3. The third step is to develop a plan or strategy to address the problem. This involves identifying the resources needed, the tasks to be completed, and the timeline for the project. 4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress. 5. The fifth step is to evaluate the results of the project. This involves comparing the actual outcomes with the objectives and goals to determine the effectiveness of the project. 6. The final step is to document the results and lessons learned. This helps to provide a record of the project and can be used to inform future projects.
